

Needle-point Bipolar Ionization (NPBI)

In a world where information regarding COVID-19 changes as rapidly as the weather report - we erred on the side of abundant caution prior to reopening our doors and installed a system all but guaranteed to kill COVID-19 within 30 minutes of the pathogen being in the air.

Check this out!

Needlepoint Bipolar Ionization (npbi) System was installed throughout the

club's HVAC system prior to our reopening on June 17th, 2020

- The npbi system produces a high concentration of positive and negative ions, delivering them into the space via the ventilation system
- Within the air stream ions attach to particles, where they combine, become larger and more easily filtered from the air
- When ions come in contact with pathogens (COVID-19), they disrupt the pathogens' surface proteins, rendering them inactive
- **This system has been proven to deactivate COVID-19 within 30 minutes.** For more information please read this article. [Click here](#)

Manufacturer's Article/Information

The Health and Safety of Our Members, Our Staff and Our Community are our top priority.

When enjoying the club, remember to:

- maintain 6 ft. social distance
- wear a mask over your nose and mouth at all times unless actively exercising or eating
- wipe down your equipment after use

We are in this together!
